

Year	Award Holder	Research Body	Research Area	Project	Awarded PoC
2013	John Quinn	UCC	LS	The evolutionary ecology of cognition across a heterogeneous landscape	
	Marie-Louise Coolahan	NUIG	SSH	The reception and circulation of early modern's women's writing, 1550-1700	
	Martin Albrecht	UCD	PR	Exploiting synergistic properties of mesoionic carbene complexes: teaching rusty metals challenging catalysis	*
2014	Lorraine Brennan	UCD	LS	Metabolomics based biomarkers of dietary intake- new tools for nutrition research	
	David Stifter	NUIM	SSH	Chronologicon Hibernicum – A probabilistic chronological framework for dating early Irish language developments and literature	
	Ruth Britto	TCD	PE	Loop amplitudes in quantum field theory	
	Madeline Lowry	UCD	PE	Multiscale modelling of the neuromuscular system for closed loop deep brain stimulation	

	Daniel Kelly	TCD	PE	3D Printing of cell laden biomimetic materials and biomolecules for joint regeneration	
	Anna Davies	TCD	SSH	SHARECITY: Assessing the practice and sustainability potential of city-based food sharing economies	
	Wolfgang Schmidt	TCD	PE	Towards Artificial Enzymes: Bio-inspired oxidations in photoactive metal-organic frameworks	
2015	Valeria Nicolosi	TCD	PE	3D Printing of Novel 2D Nanomaterials: Adding advanced 2D functionalities to revolutionary tailored 3D manufacturing	*
	Martin Sokol	TCD	SH	Western banks in Eastern Europe: New geographies of financialisation
